

Secure your incident scene with a

400MOBILE-EMS

MOBILE EMERGENCY MANAGEMENT SYSTEM

Whatever your requirements, IDentipho will work with you step-by-step to find the emergency management solution just right for your agency.

400Mobile-EMS helps disaster scene and recovery efforts by:

- Providing fast and secure credentialing for emergency workers
- Accurately account for personnel and identify available resources
- Tracking and reporting activity with ease
- Limiting access to unauthorized individuals

Functionality includes fast data entry, badge design and badge printing. It allows organizations to compute time and attendance and to track emergency workers, utility teams, patients/rations and equipment/supplies with detailed individual or group logs. With centralized management, online intranet self-registration and reporting components, 400Mobile-EMS is portable and easily deployable. The system can seamlessly integrate with multiple existing data sources in real time.

Custom development work is also available to extend the software to include additional features such as:

- Integrate with existing emergency management systems
- Integrate proprietary security features
- Work with handheld devices

Identity Management

Design and create professional, secure photo ID badges. Pre-registration feature allows cardholders to enroll online via their internal intranet. Scan driver's licenses or passports to boost security and speed data entry. System automatically checks names against watch lists during registration process and alerts can be set to be triggered at check-in.

Site Management

Know who's on the scene. Keep track of all workers entering your location easily. Track volunteers, rescue workers, medical crews, equipment and/or supplies. Check in/out personnel simply by scanning badges and IDs. The system will verify authorization.

Time and Attendance

Details of each check-in and check-out are logged. Create detailed charts and reports for card holder group. Track hours "in" and supplies or equipment issued for better resource management.

Generate Attendance and Activity Reports

Logs and reports are kept for each cardholder group allowing you to quickly generate evacuation reports or build and print customized reports. Use the charting and reporting mechanisms to view all cardholder and entry point history. These reports can be used to track any activity or function, allowing maximum flexibility.

Site Security

Set unique access control policies for each location, individual and entry time. Maintain a watch list of unwanted visitors and receive instant alerts to any potential security risk.

IDENTIFY AND PROTECT WITH SECURE ID SOLUTIONS
