

Software-Free Logon Solution using Proximity Cards!

## pcProx<sup>®</sup> -USB

## The No-Password Solution for Securing your Computer

### Features

No Software required at the client or server!

HIPAA - Helps meet HIPAA requirements

Platform independent - Supports any OS with USB support: Unix, Windows 98/2000/XP, Sun, Citrix and more.

Contact-less operation

Low cost, low maintenance!

Use existing proximity cards/tokens for computer access control

Convenient USB port

### Benefits

Increases Security - Users may eliminate passwords in a one-factor authentication mode, or combine their proximity card with passwords for a highly secure two-factor authentication system. Couple with our pcProx-Sonar auto-lock down presence detector for a full-proof solution!

Lowers Costs - Leverages the investment in building access cards by using the same card for computer access. Reduces the cost associated with password problems at the help desk.

### This Solution Solves the Problem of Using Passwords for Computer Access Control!

RF Ideas provides users with the first software-free solution for logon to secured computers. pcProx automates the secure un-locking of the PC using your existing building access proximity card/token.

Each proximity card is unique and provides employers with secure facility access control. Now users can benefit by using the same token for their computer access control needs! No more sharing, changing or forgetting passwords!

*Stop relying on user passwords!*

### Overview

pcProx attaches to the PC via the USB port and is configured by the system as a keyboard. The operating system supplies the USB compatible drivers.

When you need to logon to your computer, simply wave your proximity card across the pcProx reader while the cursor is at the password field. The reader sends keystrokes to the PC and, if valid, the logon takes place.

If you need the additional security of a two-factor system (something you have and something you know), simply require the user to complete the password by entering a PIN after the card information is supplied.

pcProx represents the lowest cost solution since there is no drain on IT support resources, software maintenance contracts, and other IT security burdens!

*Order your pcProx-USB today and leave your password problems behind!*

## Software-Free Logon Solution using Proximity Cards!

### No More Passwords

When it comes to un-locking the computer there are several choices including passwords, biometrics, and smart cards. Passwords are ultimately the least secure and most expensive when all the costs are considered. Help desk, lost productivity, sharing and forgetting passwords are among the more obvious factors to consider.

Now you can use you existing facility access proximity card for computer access as well with the pcProx desktop reader. There are no enrollment or deployment costs to incur plus the employees are already familiar with the proximity cards. Why struggle with passwords when the users can simply wave their existing ID badges to gain access?

### No Complicated Logon Software to Install

pcProx now un-locks the computer without adding software at either the client or server computer! The pcProx-USB reader is automatically recognized by the operating systems and the drivers are loaded instantly. The unique proximity number in the card becomes your logon password. To begin using the badge today, simply perform a change password and wave your proximity card when the cursor is on the 'New Password' field.

### Easy Installation...Configure the Device and Go

Installation of the pcProx is a snap! Since the pcProx attaches to the computer as a USB device, all proximity formats are read directly! Using the supplied configuration application, you may configure the reader to append a TAB or ENTER keystroke character automatically.

### Specifications

#### Typical maximum read range:

1"- 3" (2.5 - 7.6 cm) dependent upon proximity card type and environmental conditions.

#### Dimensions

2.5" x 4.2" x 0.875" (6.35 x 10.6 x 2.2 cm)

#### Power Supply

USB Model: 5.0 V supplied by USB port

#### Certifications

FCC Certification, United States

**Interface:** USB Connector

**Description:** Bi-State LED.

**Option:** private labeling of reader

**Part number** BSE-PCPRXH-USB

Configuration application included (on-line) to allow formatting of card data.

Compliment auto-identification with auto-locking! Complete your security with a desktop proximity card reader that works with your building access cards.

Presence detector sends keystrokes to self-lock or logoff the unattended computer. Keystrokes and range (2-5 feet) are all configurable.
