

IDENTIPHOTO® 5000EXPRESS IDENTITY CARD SYSTEM

CREATE SECURE CARDS WITH ONE SIMPLE AND VERSATILE SYSTEM

Dual-sided, lamination and encoder options available.

Reverse Transfer Printer

Ensure the highest image quality with one reliable system! The 5000Express system makes it possible to affordably print cards with superior image quality utilizing high definition printing technology. Whether you need event IDs or multi-function smart cards the 5000Express is the solution for you. It gives you the technology to produce great-looking card to meet your needs.

The components of the system work together seamlessly so you can take your card printing to a higher level.

By printing a reverse image on the underside of HDP film, then fusing the film to the card surface, the 5000Express printer produces image quality that looks very much like a sharp glossy photo.

Printing on film instead of directly on the card means that the uneven surface of technology cards does not compromise image quality, allowing you to achieve good quality prints time after time.

Exceptionally reliable system, which means less downtime for you!

It's complete!

The IDentiphoto® 4500Express Identity Card System includes everything you need to create secure cards.
