

RAPIDTRACK K12

Now there's a way to save time by taking out the paperwork and administrative headaches of attendance, dress code, and behavior violations. RAPIDTRACK K-12 is the simple, automated way of defining behavior policy and compliance, processing tardy students, and issuing detentions.

The RAPIDTRACK K-12 Administrative System maintains a history of each student's violations, and the scanned Photo ID can result in either PASS, WARNING, or DETENTION slips, dependent on past violations. The system includes built-in database interfaces to RAPID-CARD, POCKE TRACKER K-12, AND an import map is defined for data coming from other ID card and administrative systems.

Typically loaded on a central PC/Laptop in the school's main office, RAPIDTRACK K-12 can help minimize paperwork, and get your tardy students processed efficiently and off to class. Class schedules can also be viewed easily, so verifying which class the student needs a pass to, is just as easy as clicking a button. Individual and daily transaction reports can be generated, as well as parental notification and detention lists.

In addition to discipline and violation tracking, RAPIDTRACK K-12 can also be used for positive behavior tracking. Points can be assigned for class projects, attendance, volunteer work, honor roll, and other valued student efforts. Points can be used to "work off" negative behavior or can be cashed in for rewards at the school store.

Student
Tracking by
ID Card

Event: TARDY
Last Name: SMITH
First Name: MONICA
Date: 2007-8-5
Time: 10:08 AM

FEATURES

- Assign detentions & violations
- Displays student's photo on violation slip
- Prints hall passes
- Track late students
- Define detention schedules
- Customizable violations
- Easy full-featured reporting
- Stores violation history
- Network ready - works on networks at multiple workstations
- Can add on POCKE TRACKER K-12 to collect violations, schedules, and basic attendance data all across campus using PocketPC handhelds.

SYSTEM SPECIFICATIONS

- 32 Bit ODBC compliant for Microsoft Windows 2000/XP/Vista
- Links to any ODBC compliant table so it can work with an existing ID card database or another system table
- PC specifications are those of minimum Windows requirements for operating systems as well as for any add-on peripheral used with system such as a card reader, biometric reader, or pin pad.
- MS-SQL Server database capable of linking to other ID card and administrative systems

RAPIDTRACK K-12 Software is used as the central hub for easy exchange of student data and violation history.

*A sample RAPIDTRACK System Includes:
RAPIDTRACK K-12 Software, Triggerless Barcode Reader, and Zebra Thermal Slip Printer.*
