

Increase the Security of Your Corporate ID Badge program with

Print Security

Part of the Fargo Workbench™ Printer Utility

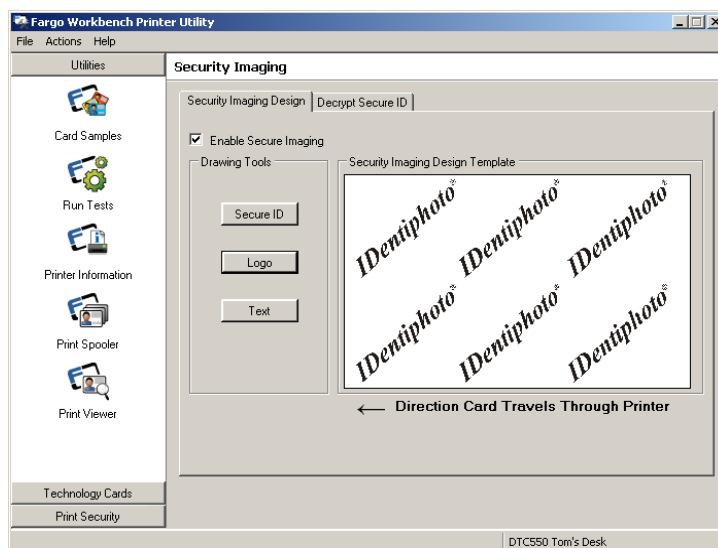

The Fargo Workbench™ Printer Utility is a printer security, diagnostics firmware upgrade tool, included with the printer driver.

Print Security, helps control the issuance and ensures the authenticity of your photo ID cards by incorporating a *Security Image* that is printed on every card with the *Fluorescent* panel of a YMCFKO or YMCFKOK ribbon and viewed under ultraviolet light.

Print Security Suite is included **FREE** with all new Fargo printer purchases and is part of the printer driver.

Through the **Fargo Workbench**, you can also

- Add password-controlled access to your printer
- Use a library of Fargo card samples
- Gain access to key printer and ribbon information
- Test operations of encoders
- Run various troubleshooting and diagnostics tools . . . and more!

Run various troubleshooting and diagnostics tests and more!
